## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-3 and 7-11 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a wall strengthening material that comprises both a modified silicone oil and one of the materials of claim 10, does not reasonably provide enablement for a wall strengthenener that lacks the modified silicone oil and the materials of claim 10. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

It appears from a reading of the specification that both the modified silicone oil and one of the materials of claim 10 are required for the claimed invention. The specification discloses no other amphipathic liquid except a modified silicone oil.

3. Claims 1-3 and 7-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not

described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The meaning of "special" at 6:4, 12:27 and 13:15 (and perhaps elsewhere) is unclear, Thus rendering the specification unclear.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-3 and 7-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a) Claim 1, line 8: it is not clear what "as a main component" is modifying – amphipathic liquid, hydrophilic group or hydrophobic group.

b) Claims 3 and 7: it is not clear if the introduction of a hydrophilic group is the modification of the silicone oil, or if some other modification is meant.

c) Claims 8 and 9: it is not clear what is meant by "special".

d) Claims 8-10: there is no antecedent basis for "them".

e) Claim 10: it is not clear where the cordierite is or how it is involved in the claimed invention.

*Claim Rejections - 35 USC § 102*

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1-3 and 7-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Hirai et al (US 2005/0181172).

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

'172 teaches a clay/ceramic honeycomb structure that is impregnated with a reinforcing agent that comprises both a modified silicone oil (such as polyether modified silicone oil) and magnesia. The clay/ceramic honeycomb structure may also contain a water-soluble binder such as methyl cellulose [0026] [0028] [0029] [0057] [0063] [0069] – [0073].
